etherwhitegold

Introduction

EtherWhiteGold is an ERC20 token focused on being a currency accessible to the public and easy to use. Its innovative features will allow the community to use EWG as a payment method in different areas of entertainment, such as virtual casinos or sports betting through the network. The online gaming industry is valued at 46 billion dollars and according to studies conducted in recent years, it is expected to grow to 56 billion dollars throughout 2018. In our view, the market of gambling in cryptocurrencies is relatively dense and plagued by users around the world, which make possible the growth of this industry considerably. With EtherWhiteGold we will make possible an absolute transparency between the player and the house of bets or online casinos, since the Blockchain technology, is highly robust and unalterable avoiding frauds that can be provoked by any of the parties.

The ERC20 is the most popular code to launch tokens in the Ethereum network, because it allows to have a standard interface to operate not only in that platform, but in third parties such as wallets and decentralized exchangers. With this new status, the rather voluntary implementation of this protocol is changed to something more automatic, with parameters ready to be defined. With the "boom" of the cryptocurrencies and the utility of the tokens themselves, there is currently a considerable amount of tokens of the ERC20 protocol deployed in the network, being useful for many and diverse implementations written by developers of different projects; and that they have their own compensations.

etherwhitegold

VISION

Our goal is to get EWG to be a worldwide cryptocurrency and revolutionize the world of entertainment in virtual casinos, making our platform the most transparent and fair for its players.

MISSION

Collect public capital to offer the best virtual platform in this area. Position yourself in the most important cryptoactive Exchanges, in such a way that you obtain a constant flow to become one of the most competent cryptocurrencies in the market and especially in this area.

Raise funds for the foundation and processing costs, with this, we can make available to players a detailed and competent virtual casino. We want to expand the market and reach people with knowledge in cryptoactive, as people without such notions (we will provide advice on the subject, to all those users who start in the world of virtual casinos or sports betting through the network). On the other hand, we will create alliances with entertainment means, to expand even more in the ecosystem of online casinos and maintain a constant traffic in our blockchain ecosystem.

etherwhitegold blockchain

Blockchain is a digitized, decentralized, public and unalterable book in which all cryptocurrency transactions are reflected. Blockchain is in constant growth since, in it, all transactions are registered from one point to another, so that all users have 100% of the information recorded in it. Transactions are recorded and added in chronological order, allowing participants in the digital currency transaction market to be aware of any movement or transaction made within this protocol. Each node (computer connected to this network) obtains a copy of the Blockchain, which is automatically downloaded, which makes it unchangeable and unalterable because to interfere in this registry all the nodes distributed in the world would have to intervene. It was originally developed as the accounting method for the Bitcoin virtual currency. Blockchain uses what is known as Distributed Ledger Technology (DLT), which is used in thousands of commercial applications today. Currently, this technology is mainly used to verify and confirm transactions. Another advantage of this technology is mainly used to verify and confirm transactions. Another advantage of this technology is that it makes it possible to digitize the code and virtually any document, such as smart contracts, among others.

etherwhitegold

description

VIRTUAL CASINO:

We will have a wide variety of virtual casino games and sports betting in different disciplines. To collect well the famous Slots, dices, Black Jack and much more.

By implementing this currency, we can make our platform have the ability to be a fair casino for players and much faster at the time of making both bets and payments to users. We will have the ability to immediately pay your profits through our cryptocurrency, since it provides the quality of making payments in real time and that can also be exchanged for other cryptocurrencies in different exchange houses.

etherwhitegold

description

WALLET:

EtherWhiteGold will have its own online wallet, which will process live payments and can substitute chips in physical casinos or any other material that could be used for fraudulent purposes, in this way, we provide the greatest security before a responsible game.

MOBILE APP:

Through our mobile application, users can play in our virtual casino from wherever they are, provided they have an optimal Internet signal. It will be a simple and very intuitive application for our user, who can make instant withdrawals to said wallet.

etherwhitegold

Projections

We will not only be in the virtual field, but our medium term objective will be to replace the issuance of physical chips in real casinos, in order to simplify the market and remove any falsifiable material from it. We will bring EtherWhiteGold to physical casinos getting a greater benefit and a remarkable value of this new cryptocurrency.

One of our goals is to form a wider community in the world of virtual entertainment; we will achieve this through the marketing campaigns that we have programmed throughout the development process.

In a second phase, we will focus on creating alliances with other virtual casinos to replace the fiat currency with EtherWhiteGold and thus, have greater control both the casino managers and the users of the funds played, benefits obtained or lost in game.

Likewise, we are carrying out dozens of encounters and meetings with the most important exchanges or exchange houses in the field of cryptocurrencies, to implement EWG in these and be able to exchange this currency for any currency for any other cryptoactive.

DISADVANTAGES OF ONLINE CASINOS THAT WE WILL OVERCOME WITH TE BLOCKCHAIN TECHNOLOGY:

Our team has identified several important obstacles associated with the operation of traditional online casinos, which affect the quality of gaming in users at the international level:

- Low speed and limited bandwidth capacity (latency between user action and the subsequent result).
- Lack of flexibility in game variations and logic.
- Insufficient control over the players, to detect fraudulent actions related to bonuses and affiliate payments.
- Inability to attract customers who prefer bets with Fiat coins.
- Dependence on unknown providers such as Oracle, oracalize, random.org, etc.

etherwhitegold.io

etherwhitegold

examples of online casinos

www.vdice.io

Started in June 2016, vDice has processed around 52,000 bets and has paid around 13,000 ETHS to players in gross earnings. The betting house operates at an advantage of 1.9%, according to its website, almost twice the average of projects based on dice betting.

It should be noted, however, that vDice, which has also been built around "proclaimed transparency" though, is having difficulty in reflecting basic metrics, such as wagered volumes, profits, etc. Causing users to devote additional time to their own calculations. Our solutions will solve this problem from multiple Ethereum contracts to derive conclusions and provide solutions or general reports to each user.

www.etheroll.io

Etheroll has processed around 26,000 bets since July 2016 and has distributed approximately 650 ETHS in prizes. The players have paid an average of 140 ETHS in transaction fees (commissions, which is more than 20% of the house's earnings.) Something uncomfortable for the user and with easy projection for an immediate solution.

etherwhitegold

examples of online casinos

BirDice Casino

For the same period, BitDice casino, which operates with a house commission of 1% in its dice game, has processed more than 9 million bets only in ETHS. More than 157,000 Ethers have been wagered and almost 3,500 Ethers have been won by the house through commissions implanted in this platform.

The big difference between the solution based on Blockchain and the solution outside the conventional blockchain used by most casinos is the "sophisticated transparency" offered by the games registered in this network (Blockchain). In fact, the players can take a pragmatic approach when selecting a trusted provider in casinos with a verifiable history, low cost of execution and that includes the favorite games of the users.

etherwhitegold road map

2018

- EWG ICO Launching.
- Start and general development

2018

- Industrial research and marketing.
- The first agreements were made with external companies (casinos, exchanges and developers).

2018

- EWG Token for sale.
- Participants in the ICO (token holders) will have access to the Beta version of the APP.

2018

- Online Wallet implementation.

2019

- Positioning in different cryptocurrency markets (exchanges).
- App improvements.

2019

- We add sports bets in our interface.
- API development.
- Integration of the currency in other casinos.

2019

- Official launching

*Note: the road map may suffer changes in the future.
In case of adding another event we will be notifying you.*

etherwhitegold

legal warning

The objective of this whitepaper is to present the EtherWhiteGold project to potential investors in EWG tokens. The information offered in this document is not exhaustive and does not imply contractual obligations. Its objective is to offer the most relevant and detailed information to the future users, which will allow it to make decisions about its relations regarding its future relations with the company and the main offer of EWG tokens in view of its possible acquisition. No section of this whitepaper can be interpreted as an offer prospectus or investment offer of any kind. This original sale of EWG tokens does not represent an offer to sell or purchase securities in any jurisdiction. We do not offer the purchase of EWG tokens to citizens or legal entities of the United States of America or the Republic of Singapore, nor to people who do not have sufficient legal capacity or ability to participate in purchasing EWG tokens under the laws in force in the country of residence of said persons, in case such legislations were applicable. If you are not sure if you are eligible to participate in the ICO and purchase EWG tokens, please contact a professional, finance, tax or other adviser of this type.

This document has been edited without consideration of any legislation or law of any jurisdiction; it has been designed to provide information to investors and is not regulated by them. Some of the statements, calculations and indicators in this whitepaper are considered preliminary, protected and estimated information.

etherwhitegold

legal warning

They can be based on known or unknown factors of risk or uncertainty. The actual circumstances and results may vary significantly from the calculations and consequential results set forth in this document, which have been offered directly or indirectly for such preliminary predictions. Your participation in the ICO is only done voluntarily. An ICO (Initial Coin Offering) is fundamentally a voluntary fundraising campaign (Campaign of donations to raise funds with a marked objective). To participate in the same, you must accept the terms and conditions of this donation campaign for the collection of EWG funds. Please read them carefully and analyze any factors before participating in the ICO. Make sure you understand the conditions and risks described in the document.

Additionally, the confirmations and guarantees offered through the acceptance of the terms and conditions of participation in the donation campaign to raise funds with your pre-requisites in the ICO will be solely your responsibility. If you cannot offer any of the guarantees or benefits, we will be forced to deny your participation in the ICO and purchase of EWG tokens.
